

UMAR KHAN | Full Stack Developer

Address: Street#10 Muhalla Ittehad Town Near Rangers Head Quarter Lahore
Phone: 0302-9615132
Email: umair6029@gmail.com
GitHub: www.github.com/umarkhan905

SUMMARY

Detail-oriented and results-driven Full Stack Web Developer with hands-on experience in building modern, scalable web applications using technologies like HTML, CSS, JavaScript, React.js, Node.js, Express.js, and MongoDB. Proficient in Next.js and TypeScript for server-side rendering and type-safe development, and skilled in creating responsive, user-friendly UIs with Tailwind CSS. Strong knowledge of RESTful APIs, MySQL, and version control using Git/GitHub. Passionate about writing clean, maintainable code and collaborating in agile development environments to deliver high-quality software solutions.

EDUCATION

Bachelor of Science in Computer Science (BSCS) 2021 – Present (8th Semester)
Pak Vision College, Lahore – Affiliated with Government College University Faisalabad (GCUF)

Intermediate in Computer Science (ICS) 2019 - 2021
Government Islamia College, Railway Road, Lahore

Matric – Computer Science 2017 - 2019
CDG Boys High School, Gojjar Colony, Lahore

TECHNICAL SKILLS

- **Frontend:**

1. HTML
2. CSS
3. JavaScript
4. React.js
5. Next.js
6. TypeScript
7. Tailwind CSS
- **State Management & Data Handling:**

1. Zustand
2. Redux
3. React Query
- **Backend:**

1. Node.js
2. Express.js
3. Prisma
4. Drizzle ORM
5. Convex
6. Redis
- **Databases:**

1. MongoDB
2. MySQL
- **Tools & Platforms:**

1. Git & GitHub
2. Postman
3. VS Code
4. Agile Development
- **Currently Learning:**

1. AI Tools
2. Frontend Testing
3. Backend Testing
4. API Documentation

WORK EXPERIENCE

Full Stack Developer (Intern) – Codeiez (Hybrid) Mar 2025 - May 2025

- Contributed to the development of a real-world e-medical web application using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Collaborated with a team in a hybrid work environment following Agile development practices (daily standups, sprint planning, Jira/Trello tools).
- Built and debugged full-stack features, including dynamic user interfaces and secure API endpoints.
- Gained practical experience with Git/GitHub for version control and team-based workflows.

Full Stack Developer (Intern) – Elevorix Solutions (Remote) Oct 2024 - Dec 2024

- Worked on resolving minor UI/UX and functionality issues on the company's official website.
- Learned and practiced version control using Git/GitHub in a collaborative environment.
- Gained exposure to real-world web development workflows and codebase management.

PORJECTS

AI Based Interview Platform

- A SaaS (Software as a Service) web application designed to streamline and enhance the interview process for both recruiters and candidates. The platform includes role-based authentication with Credentials and OAuth and offers separate dashboards for recruiters and candidates. It leverages LLMs (Large Language Models) to generate interviews and feedback, and integrates conversational AI for voice-based interviews.
- **Tech Stack:** Next.js, TypeScript, Tailwind CSS + Shadcn, Convex DB, Vercel AI SDK, Google Gemini, Vapi AI, Clerk Auth, Stripe.

Paw Perfect (In Progress)

- An e-commerce web application built for pet lovers to purchase food and supplies for cats and dogs. The platform features a public shopping interface and an admin dashboard for managing products and orders.
- **Tech Stack:** MERN Stack, Tailwind CSS, ShadCN, Zustand, React Query (planned)

Dev Kit AI (In Progress)

- A developer-focused AI toolset designed to boost productivity and assist with everyday development tasks. Offers a suite of smart utilities such as Code Review, Code Explanation, Wireframe to Code, Bug Fixer, Language Converter, Regex Generator.
- **Tech Stack:** MERN Stack

MERN Starter Kit(In Progress)

- A developer-focused AI toolset designed to boost productivity and assist with everyday development tasks. Offers a suite of smart utilities such as Code Review, Code Explanation, Wireframe to Code, Bug Fixer, Language Converter, Regex Generator.
- **Tech Stack:** MERN Stack, Tailwind CSS, ShadCN, TypeScript, Zustand, React Email, Resend/Mailtrap.

Full Stack Netflix Clone

- Developed a Netflix-like platform using the MERN stack with Tailwind CSS for styling and the TMDB API for movie data. Features include user authentication, movie browsing, search functionality, and a sleek, responsive UI for a seamless streaming experience.
- **Tech Stack:** React.js, Tailwind CSS, Node.js, Express.js, Mongo DB, TMDB.

Real Estate Website

- Developed a comprehensive real estate platform using the MERN stack, with state management through Redux Toolkit and styled with Tailwind CSS. Features include property listings, search and filter functionality, user authentication, and a responsive interface.
- **Tech Stack:** React.js, Tailwind CSS, Node.js, Express.js, Mongo DB, Redux.

Spotify API

- Created a Spotify-like API using Express, Node.js, and MongoDB, featuring robust functionalities for admin and artist management, song cataloging, and advanced search capabilities. The API supports role-based access, allowing admins to manage artists and songs while enabling artists to upload and manage their content. Advanced search filters provide users with precise, customized results.
- **Tech Stack:** Node.js, Express.js, Mongo DB.
